

## Finland Post Corporation selects Exidio

Finland Post Corporation has chosen Exidio's workflow solution Trezone<sup>®</sup> for cash flow forecasting globally. The Trezone<sup>®</sup> Cash module enables Finland Post to gather real time cash forecasting and accuracy data from all its subsidiaries through an easy-to-use web browser interface.

"International operations capability is essential for a logistics company, and managing the financial situation globally can easily become a burden at the head office. With Exidio's product we are able to significantly improve the quality and timeliness of cash flow forecasting data, while saving time that was earlier spent on filling out, sending and reviewing spreadsheets. The user-friendly interface and availability of forecast accuracy analytics motivate our subsidiary offices to improved processes", says Finance Manager Tapio Lehtinen at Finland Post. "Thanks to a speedy implementation project, we had the service configured and were able to start using the product after only a week from contract signing", Lehtinen adds.

"Finland Post is a leader in its space and an innovative international player in the information logistics business. Exidio is proud to support their global expansion by providing tools for improved cash flow analytics and planning, and we look forward to further developing this cooperation", says Exidio CEO Timo Hämäläinen.

### About Finland Post Corporation

Finland Post is the leading provider of delivery and logistics services in Finland and selected markets in northern Europe. The Group is seeking growth, particularly in information logistics, comprehensive logistics solutions and international business.

### About Exidio

Exidio is a financial software company offering solutions for automating treasury processes and treasury analytics of large corporations. The solution helps to ensure the transparency of foreign exchange exposures as well as optimal use of cash assets at all times. The service eliminates manual spreadsheet-based workload and provides support to comply with accounting and financial standards like IAS 39 / FAS133 and SOX. Exidio's clientele consists of multinational companies and global banks, which offer the service to their top tier corporate clients as part of their e-commerce offering.

Founded in 2000, privately held and headquartered in Finland, Exidio is a profitable and growing software vendor, with majority of revenues generated through international business. For more information please go to: [www.exidio.com](http://www.exidio.com)
