

WAV® and SkyPilot Sign Distribution Agreement

Distribution Partnership Delivers Value-Added Broadband Wireless and Mobility Solutions

AURORA, IL – (PRWEB) – August 1, 2008 – WAV, Inc., the value-added distributor of wireless, security, RFID, VoIP and portable data-collection equipment, announced that it has extended its product portfolio by signing a distribution agreement with SkyPilot Networks. Under this new agreement, WAV will now offer SkyPilot's entire line of broadband wireless products.

"SkyPilot has a proven product line and an excellent reputation among service providers as a cost-effective method of deploying long-range and high-capacity wireless," said Norm Dumbroff, president and CEO of WAV, Inc. "SkyPilot's unique backhaul capabilities provide the flexibility that our channel partners need to reach into new markets, and with WAV's portfolio of value-added services, we can provide a total solution to our entire community of wireless and mobile solution providers and value-added resellers (VARs)."

SkyPilot's broadband wireless products enable a wide range of applications, including fixed broadband Internet access, VoIP, video surveillance, and automatic meter reading (AMR). With SkyPilot, WAV extends its broadband wireless portfolio with a unique solution that can combine a point-to-multipoint base station, a multi-hop wireless relay, and a point-to-point link into a single system.

The SkyGateway and SkyExtender products provide point-to-multipoint to low-cost SkyConnector customer premise equipment (CPE) as well as provide a unique synchronous multi-hop backhaul to extend range and increase capacity. These 5 GHz solutions can also be integrated with long-range Wi-Fi access points at 2.4 GHz for IEEE 802.11b/g and 4.9 GHz for mobile public safety.

"At SkyPilot, we focus on building innovative broadband wireless products and leveraging value-added distributors to provide the full breadth of services required for a total solution," said Paul Gordon, president and CEO of SkyPilot. "For years, WAV has showcased its ability to provide the wireless community with a valuable blend of products and services and we look forward to adding our unique products to the WAV portfolio."

WAV is the industry's only single-stop resource providing the depth of knowledge and expert services required to fully address the specific technology and value-added services needs of the VAR and Solution Provider community. WAV performs professional services for its Solution Provider community including site surveys, software and hardware development and integration, custom rollout kits, installation and technical support.

About WAV, Inc.

WAV, Inc. is a full-service, value-added distributor of wireless broadband, wireless LAN, wireless security, data collection hardware, mobile computing products, rugged computing products, mobile printers and voice over IP technology. Located in Aurora, IL, WAV offers value-added services, product availability and unmatched technical expertise to our VAR channel. WAV provides its partners a competitive edge by offering extensive product knowledge, support for multi-vendor solutions, as well as professional value-added services for its VAR community, including (but not limited to): site surveys, software and hardware development and integration, custom rollouts, installation and technical support. About SkyPilot Networks

SkyPilot Networks is a leading provider of carrier-class broadband wireless solutions that enable service providers, municipalities, and public safety agencies to rapidly deploy cost-effective broadband access, voice over IP, public and private Wi-Fi access, video surveillance, and other wireless applications. The SkyPilot solution utilizes a patent-pending synchronous mesh architecture with high-speed switched directional antenna arrays that extends reach, mitigates interference, and maximizes spectral reuse. The result is a highly scalable, reliable, and deterministic mesh network that simplifies design, increases deployment flexibility, and dramatically reduces equipment and operating costs. SkyPilot has proven

scalability and reliability with over 40,000 units shipped to customers in over 50 countries. SkyPilot is a privately held company based in Santa Clara, California. For more information on SkyPilot and its solutions, contact pr@skypilot.com or visit <http://www.skypilot.com>.
