

Ekahau Announces Wi-Fi Location Tracking for 802.11 A and G Networks

The Ekahau Positioning Engine expands Wi-Fi Location Tracking to cover 802.11 a, b and g Networks

Saratoga, California - April 26, 2004 - Ekahau, the leading provider of accurate Wi-Fi positioning solutions and site survey tools, today announced the availability of 802.11 a and g support to the award winning Ekahau Positioning Engine (EPE). Enterprises now have an additional option for location aware services and real-time tracking that can be used on all current commercial modes of Wi- Fi.

"The Ekahau Positioning Engine has proven itself in the market to be the most accurate and flexible positioning solution over 802.11B networks. As enterprises consider the adoption of higher bandwidth Wi-Fi standards such as a and g, Ekahau can now migrate its location and tracking capabilities to other Wi-Fi standards making EPE a future proof solution for any type of radio-based tracking" stated Mr. Lare Lekman, CTO of Ekahau Inc. "The advances we have recently made with the Ekahau Client, an integral component of the Ekahau Positioning Engine architecture, position Ekahau well ahead of the competition in our ability to support industry standard networks and open architectures" continued Lekman.

The Ekahau Client which allows EPE to locate Wi-Fi -enabled devices and which is a part of the Ekahau Positioning Engine package provides the real-time network measurement data for Ekahau's solutions. By releasing the new Ekahau Client 3.2, Ekahau products support a multitude of 802.11 a, b and g Wi-Fi devices for the Ekahau Positioning Engine. The Ekahau Client 3.2 also adds positioning support for a variety of widely available 802.11B Wi-Fi client devices such as NIC cards, CF-Cards, SD- cards, and PDA's. Ekahau Client 3.2 is available for free at web: <http://www.ekahau.com/products/client/>

About Ekahau, Inc.

Ekahau, Inc. is the industry leader in location-enabling Wi-Fi networks. Ekahau's customers include leading corporations around the world that are realizing the benefits of Wi-Fi -based location services and innovative network planning and optimization tools. Ekahau partners include wireless software developers, leading system integrators, and international OEM partners, who develop and market next generation location-based applications.
