

Lenovo and Bitfone Pioneer Device Management in China

November 28, 2006

Three Lenovo Devices Commercially Launch with Bitfone's mProve

Laguna Niguel, California, Nov 28, 2006 - Bitfone Corporation (www.bitfone.com), a pioneer and a patent holder of over-the-air (OTA) technology for mobile phones, today announced that Lenovo (ADR: LNVGY), the number one Chinese mobile brand and number four ranked manufacturer overall in the Chinese market, has commercially launched Bitfone's OTA device management solution, mProve, on its E328, E368, and P780 mobile phones with China Mobile.

mProve is a comprehensive device management solution that enables Lenovo to provide a superior and hassle-free user experience. mProve provides the ability to enhance device features OTA with firmware and software updates, ensure mobile services such as email and multimedia messaging are always operational with remote configuration, and quickly identify any potential device problems with remote diagnostics.

"Manufacturers, such as Lenovo, are finding fantastic opportunities to differentiate their phones at the firmware and software levels and we are excited to provide a key technology to help them deliver an enhanced mobile experience," said Gene Wang, CEO of Bitfone. "Mobile device management has proven to be a worldwide necessity as demonstrated by the adoption by leading vendors around the world."

As mobile devices and data services continue to evolve with advanced offering such as mobile TV, email, and music streaming, the need for over-the-air device management becomes increasingly important in order to support these services. Bitfone's end-to-end solutions and expertise have been adopted by leading OEMs and service providers worldwide to manage service availability and deliver a superior mobile experience.
