

# Eureka Project with Conformiq as Partner Wins Award

## October 2005

During the 6th ITEA Symposium in Helsinki on the 15th and 16th of October 2005 the TT-MEDAL project was awarded the ITEA Achievement Award 2005 for outstanding contributions to the ITEA programme with the following wording:

*The Board of ITEA – Information Technology for European Advancement – has selected the TT-Medal (Test & testing methodologies for advanced languages) project as the winner of the ITEA 2005 Achievement Award. This project has achieved a major breakthrough by developing a generic standardised solution for software system testing. TT-Medal offers great potential for European industry to achieve a reduction in test development and test execution time in the near future and, at the same time, fulfil demands for high product quality. The results provide a unique opportunity for European test tool suppliers and consultants to position themselves better in a world market that has been dominated by the USA.*

ITEA, "Information Technology for European Advancement", is one of the most important industrial clusters within the Eureka framework.

Eureka is a pan-European network for market-oriented, industrial R&D.

Created as an intergovernmental Initiative in 1985, Eureka aims to enhance European competitiveness through its support to businesses, research centres and universities who carry out pan-European projects to develop innovative products, processes and services.

Conformiq's principal representative in the project was Mr. Antti Huima.
