

Conformiq Supplies Test Automation Solution to Visto

May 2006

Conformiq is providing its Conformiq Test Generator™ to Visto Corporation, the leading global provider of secure push email. The solution enables Visto to improve the efficiency of its quality assurance procedures.

Visto Corporation's products and solutions empower mobile operators to offer their subscribers instantaneous access to email, calendar, contacts and tasks on the broadest set of mobile handsets. Visto Mobile™ with ConstantSync™ technology works in real-time, providing mobile users with more choice and maximum control over both personal and professional information.

Conformiq Software Ltd. is a leading expert and innovator in the area of model driven quality assurance. Model driven quality assurance automates software testing and validation efforts, allowing quality assurance personnel to focus on high-level and creative system and test design tasks. Conformiq Test Generator™ is a proven solution for model driven functional testing of software.

"Visto's customers and technology partners include global market leaders. Introducing Conformiq Test Generator enables us to meet their strict quality demands in a more cost efficient way", says Mr. Nikos Kryvossidis, Vice President Engineering at Visto Ltd.

"Visto's products are of a high technical complexity and an ideal fit for Conformiq Test Generator. This deal with Visto further strengthens Conformiq's position in the mobile market, which is one of our key focus areas", says Mr. Peter Holmström, Sales Director of Conformiq Software Ltd.
