

Hybrid Graphics Wins Red Herring's European Top 100

Red Herring's European Top 100 award is given to a hundred privately held innovative technology companies in Europe and Israel

Helsinki, April 12 2005

Hybrid Graphics Ltd. has been chosen as one of the winners of the Red Herring European Top 100 competition. The award was given to a hundred leading and most innovative technology companies in Europe and Israel.

"We are proud and excited to be chosen among the best 100", says Mikael Honkavaara, CEO of Hybrid Graphics. "We have worked hard for the past 10 years to achieve our current position of a market leader. The most valuable recognition to a company is naturally financial success, but being chosen among the winners of Red Herring's competition is yet again a clear indication of the fact that we are trusted and believed in also outside the industry that has already grown to trust us. We are very happy about it."

Hybrid was chosen among the victorious 100 in a two-phased process with more than 600 initial participants. The first phase was the choosing of 200 finalists, of which the 100 happy winners were chosen. The assessment of the participants was based on financial data, quality of management, execution of strategy and dedication to research and development.

Besides Hybrid, four other Finnish companies were selected among the top 100: CRF, Jutel, Leiki and Meridea Financial Software.

Hybrid Graphics

Hybrid Graphics of Helsinki, Finland is the market leading embedded 3D graphics software provider. Hybrid has over 10 years of experience in developing graphics technology solutions for consumer devices, and the company released the first official OpenGL ES API software implementation in 2003. Hybrid is an active participant in several Java JSR standard groups and is a board member of the Khronos Group, a consortium responsible for OpenGL ES and other graphics standards for embedded devices. Hybrid's clients are leading device and hardware manufacturers, who currently command over half of the total mobile phone market. Hybrid's clients include Nokia, Ericsson, Philips, Symbian, Esmertec, Bitboys and Fathammer. For more information see www.hybrid.fi
